AHEAD SDG Track

The AHEAD program is divided in 3 main stages: **BOOTCAMP**, **PHASE 1** and **PHASE 2**.

The 4-day bootcamp is the critical entry gate. Assess your venture readiness levels with industry, entrepreneurship as well as team, market and product development coaches and create your tailored roadmap with their feedback. While going through Phase 1, you will receive 50,000 € to show us that you are addressing a deep customer problem, clearly define the IP you need, and build a convincing team. AHEAD will support you with networking events, workshops, coaching, co-working, access to Fraunhofer laboratories and everything else that is needed. Apply to Phase 2 based on the term sheet and your go-to-market strategy. Get a flexible amount of funding and ongoing support for a further maximum of 18 months. There is one single objective: bringing technology to market.
