

# OrthoRegister

Daten sind unser effektivster Wirkstoff

## The Project

The centre of our technology is a safe and secure register (harmonised with DSGVO) that is operated by professionals and patients via App that can be accessed through various platforms. It contains various items that are needed when dealing with insurances as well as functional assessments that track an amputee's progression. Perceptively, the register will expand to other fields of orthopaedics.

## The Team

**Location:** Fraunhofer IPA in Stuttgart

**Members:** Duc Nguyen, Kristina Michel, Urban Daub

**AHEAD Infos** Batch: 09/2023 Phase: 1 Track: undecided
